SUMMARY

A skilled engineering student and web developer with experience in building dynamic, user-friendly websites and web applications. Proficient in Flutter development, and creating seamless user experiences using modern technologies like React JS, and Flutter Dart.

PROFESSIONAL EXPERIENCE

Internship, Agevole innovation PVT.LTD :

May 2025 - June 2025

Served as a Flutter Developer Intern at Agevole, where I worked on the Cash In-Out mobile application using Flutter and Dart. Contributed to building adaptive and user-friendly interfaces while implementing core features for client information management and financial transactions. Integrated Firebase Authentication along with PHP-MySQL APIs to ensure secure user access and efficient data synchronization. Actively participated in troubleshooting, enhancing app performance, and refining the user experience by following clean coding practices.

MAJOR PROJECTS

Picks7 : A Gambling Application : [Link](#)

Jan 2025 - March 2025

- Developed and optimized the frontend of an online gambling app, enhancing user experience with a responsive and intuitive interface.
- Led deployment, testing, and coordination with the team to ensure top performance, security, and a faster project delivery.

AI StudyHelper : Smart Study Assistant :

Septmber 2025 – December 2025

- AI-Powered Learning Platform - An educational web application that uses Google Gemini AI and OpenAI to generate intelligent flashcards, create adaptive quizzes, and provide personalized tutoring through an interactive chat interface.
- Progress Tracking & Analytics - Features comprehensive learning analytics that monitor student progress, track performance over time, provide detailed insights into strengths and weaknesses, and offer personalized study recommendations.
- Full-Stack Application - Built with React frontend and Node.js/Express backend, integrating Firebase authentication, MongoDB database, and AI services to deliver a seamless cross-platform study experience with chat history, flashcard management, and quiz generation capabilities.

Trexo : Marketplace Buy and Sell Vehicle and Property :

July 2025 – October 2025

- Developed Trexo Marketplace, a mobile application that enables users to buy and sell second-hand vehicles and properties.
- Implemented user authentication, listing management, search & filters, and seller contact features with a clean, user-friendly interface.
- The app allows users to create listings with images, prices, and detailed descriptions, search and filter listings, and directly contact sellers. Built with a focus on usability, scalability, and real-world marketplace workflows.

FinEd : Financial App : [Link](#)**Feb 2025**

- Developed and optimized the Finance tracking web-app for Students.
 - Students can track their budget and learned from games.
 - There is an AI assistant for any question or query.
- SKILLS SUMMERY

-
- **Languages/Technologies :** C, C++, Python, React JS, Fluttter, Typescript, MongoDB, Firebase
 - **Plateforms :** Git/GitHub, VS Code, Android Studio, Figma, Canva, IntelliJ IDEA, Jira, N8N

EDUCATION**July 2023 - July 2027****B.Tech in Computer Science Engineering**

CHARUSAT University : DEPSTAR Institute

- Currently pursuing B.Tech in Computer Science Engineering with a GPA of 9.0.
- Recently cleared DBMS NPTEL exam.
